<Ver.3.1.30>　2025.9

CONTENTS

1) New Features and Improvements
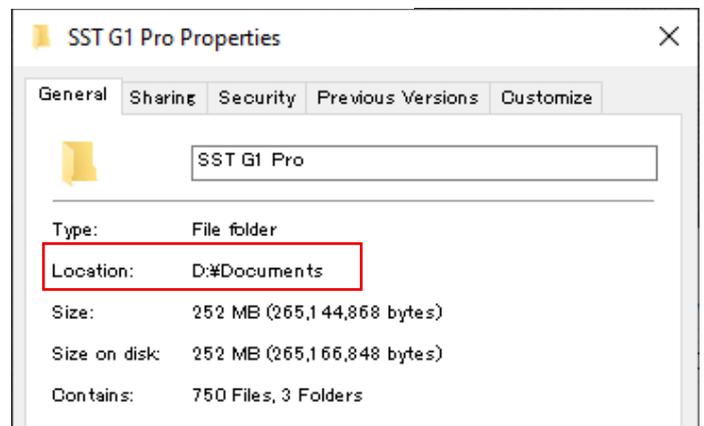

●Adapt to OneDrive issues

- If the Documents folder on your PC is set to sync with OneDrive, the location where SSTG1Pro's configuration files are saved will now change from the OneDrive Documents folder to the local drive Documents folder.

⚠️This specification change in the latest version will not affect PCs that do not sync their Documents folder with OneDrive.
It only applies to those whose Documents folder is synced with OneDrive on their PC.

< How to check if your Documents folder is syncing with OneDrive >

① Open the Documents folder and right-click on "SST G1 Pro" in the folder
　　→Open Properties

② If "Location" contains "OneDrive", such as
　　C:¥Users¥<username>¥OneDrive¥Documents,
　　it is synced with OneDrive.

③ Also, if you open the Documents folder and the folder or file icon has a ⊘ or ☁ mark, it is synced with OneDrive.

●Message after update

If your Documents folder is synced with OneDrive, the following message will be displayed the first time you start SSTG1Pro after updating.

CANVASs SSTG1 Pro

SSTG1Proの設定ファイルがOneDrive上に存在するため、ローカルドライブへ移動します。
本バージョン以降は、フォーマット設定／ユーザー設定／文字カウント設定／最終チェックフィルタ
設定の登録リストをOneDrive経由で他のPCと共有することはできません。
PCごとに独立して保存されますのでご注意ください。

SSTG1Proを起動しますか？

はい　　　いいえ

CANVASs SSTG1 Pro

Since SSTG1Pro configuration files exists on OneDrive, move them to your local drive.
With this version or later, registered lists of format settings/user settings/character count
settings/final check filter settings cannot be shared with other PCs via OneDrive.
Please note that the files are saved independently for each PC.

Do you want to launch SSTG1Pro?

Yes　　　No

If you click "No", the following changes will not be made and the software will not start.
If you click "Yes", the SSTG1Pro's configuration files (*) in OneDrive will be copied to the local drive, and from then on the local drive will be referenced/updated. Please rest assured that any lists that you have saved will not be lost.

＊ The SSTG1Pro's configuration files contain the following information:
- Format Configurations lists
- User Settings lists
- Character Count lists
- Final Check Filter lists / Check Words lists
- Association of video files with sdb files

⚠ After updating to the latest version, the SSTG1Pro configuration files will be saved to the local drive, so you will not be able to share the configurations with other PCs via OneDrive. Please configure for each PC.

⚠ If you downgrade from the latest version to version 3.1.26 or lower, the save destination of the SSTG1Pro configuration files will revert to OneDrive in case your PC's Documents folder syncs with OneDrive. Please note that if you do this, any lists you have set in this version will be lost.

The destination folders for backup files, waveform data files, and regular backup files will not change even if they are set to OneDrive. If you want to change them, please change from the [Configuration] − [User Settings] − [Maintenance] tab.

Background of this specification change

With the introduction of OneDrive in Windows10, if the Documents folder on your PC was set to sync with OneDrive, the SSTG1Pro configuration files were also saved in the OneDrive Documents folder.
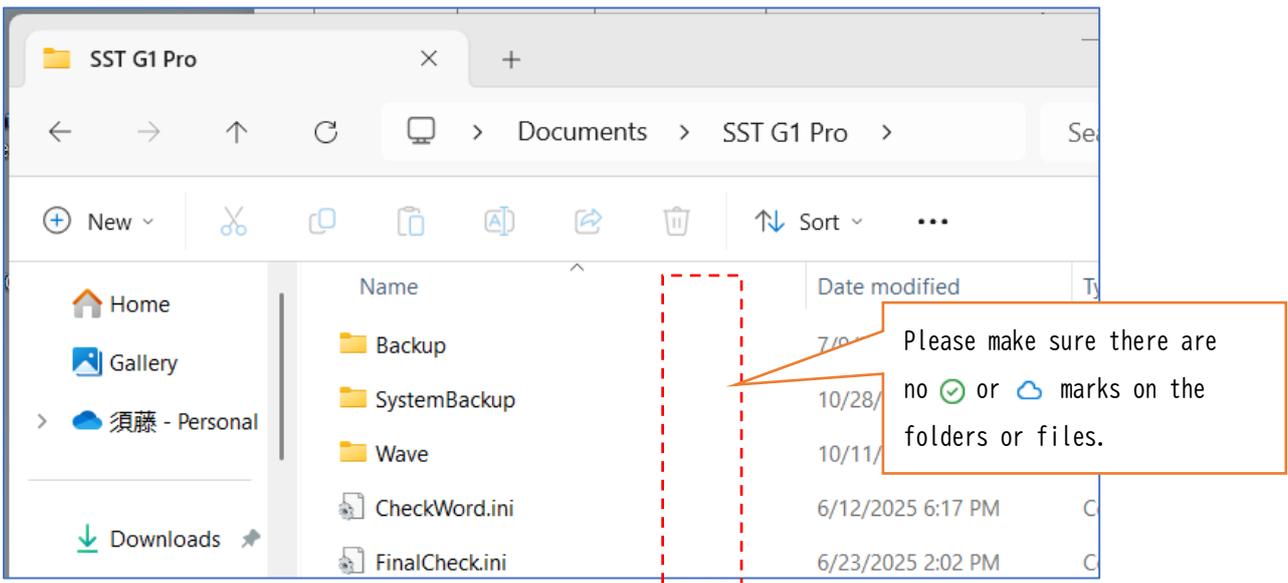

This caused problems such as errors occurring when SSTG1Pro was unable to properly load the configuration files on OneDrive at startup, the configuration files being overwritten by another PC syncing via OneDrive, causing registered lists to disappear, and problems with saving sdb files or loading waveform data not working properly. Once these problems occurred, the only solution was to disable synchronization with OneDrive.

For this reason, in the latest version, the SSTG1Pro configuration files are now saved on a local drive that is not affected by OneDrive.
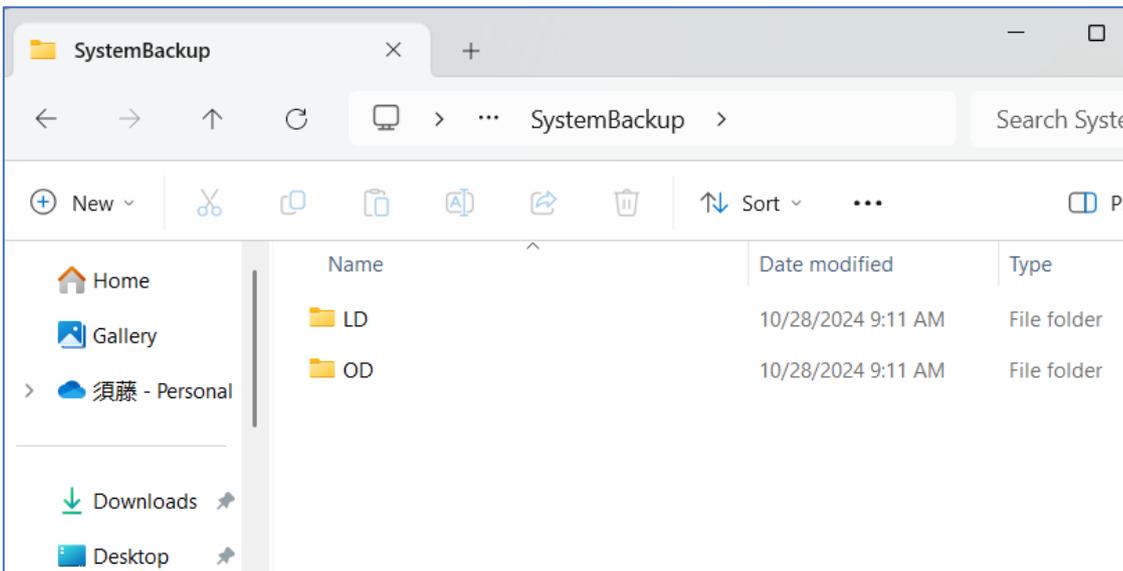

●What to do if your SSTG1Pro settings have been lost

If your SSTG1Pro User Settings or Format Configurations have been lost (reset) after an update, you can recover them from a backup by following the steps below.

① Open [SST G1 Pro] folder in the local Documents folder (C:¥Users¥<username>¥Documents¥).
＊Please open the local Documents folder, not OneDrive.

② Open [SystemBackup] folder in [SST G1 Pro] folder.

Please make sure there are no ⊘ or ☁ marks on the folders or files.

③ Confirm that [LD] and [OD] folders exist in [SystemBackup] folder, and;
　 If Documents folder is on a local drive: open [LD] folder
　 If Documents folder is synced with OneDrive: open [OD] folder

④ Copy all the files in the folder opened in ③ and paste them into [SST G1 Pro] folder in Documents folder on the local drive (C:¥Users¥<user name>¥Documents¥SST G1 Pro).
　Overwrite any files with the same name that exist.

⑤ Start SSTG1Pro and confirm that User settings, Format Configurations, etc. have been restored.

● Export IMSC1.1 (TTML2) ＊ Paid option
- You can now output IMSC1.1 files that meet Paramount delivery specifications.
By selecting "Paramount" in the [Advanced] tab, you can output IMSC1.1 files that comply with Paramount delivery specifications.

【Common matters among all output types】

Among the items that can be configured in a sdb file, the following will not be reflected in the exported file, since they do not have corresponding settings in the IMSC1.1 specification.

┌─── **Items not reflected in all of the IMSC1.1** ───────────┐

・Kerning / Leading

・Font Width

・Ruby Size / Width / Edge size / Move relative to the body text when italic

・Decrease the single-byte space value by half

・Unrecognized character for line

・Top Align

・Ruby in a base line

・Vertical subtitle of WORD style

・Baseline

・Fade In / Fade Out →There are corresponding settings in the IMSC1.1 specification. However, it will not be reflected in the files exported from SSTG1Pro.

└───┘

【Common matters among Netflix / Disney+ / Paramount】

Some items that are configurable in the IMSC1.1 specification for W3C are not supported in the IMSC1.1 specification for Netflix / Disney+ Paramount.

Therefore, the following will be reflected in the IMSC1.1 files exported with [Original] option, but not in the files exported with [Netflix] and [Disney+] and [Paramount] option.
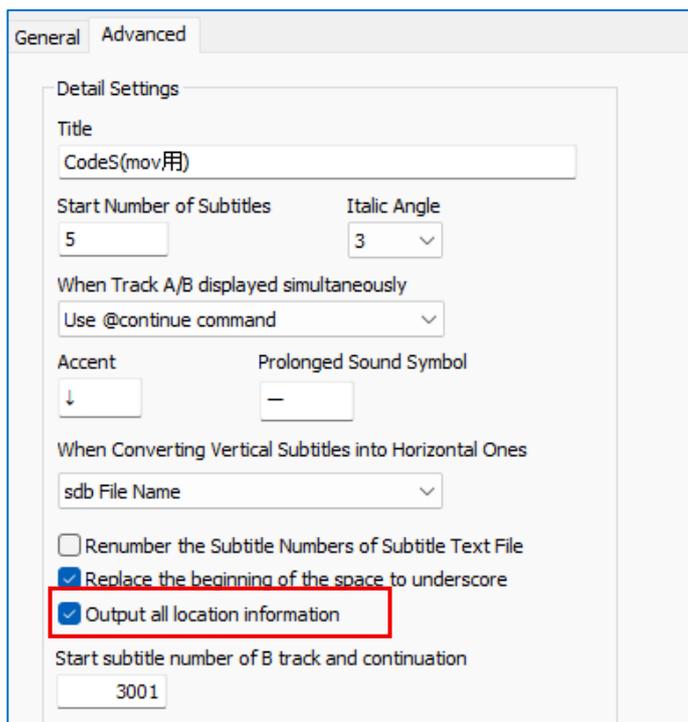

┌─── **Items not reflected in the IMSC1.1 files for Netflix / Disney+ / Paramount** ───┐

・Font Name / Size / Color

・Edge Type / Size / Color

・Ruby Position

・Ruby Leading

・Mask

・Right to Left

・A new line from the left to the right

Those items may have been changed due to specification updates by each company in the future.

└───┘

●Export Videotron/Lambda *Paid option

- We have added [Output all location information] option.

We have added [Output all location information] option in [Advanced] tab. When this option is enabled, location information of all subtitles will be output.
It applies to both Individual File (.txt) and Integrated File (.cap).

Example: Existing cap file

10	01014712/01014809	もしもし			
11	01015000/01015117	やあ 今どこに？			@斜3
12	01015122/01015312	伯母の家にいるの			
13	01015326/01015610	休日なのに忙しいね			
14	01015628/01020020	実は 近くのデパートに		@縦左	@中頭
		来ているんだ			
3	01020028/01020116	"彼氏から電話"			
3	01020116/01020220	"彼氏から電話"	@継続		
15		寄っても？ @縦左		@行頭	
3	01020220/01020322	"彼氏から電話"			

In the existing cap file, position information has not been output for subtitles in the default format. It has been only output for subtitles that had individual display positions set.

Cap file with [Output all location information] enabled

10	01014712/01014809	もしもし @横下		@中頭	
11	01015000/01015117	やあ 今どこに？	@横下	@中頭	@斜3
12	01015122/01015312	伯母の家にいるの	@横下	@中頭	
13	01015326/01015610	休日なのに忙しいね	@横下	@中頭	
14	01015628/01020020	実は 近くのデパートに		@縦左	@中頭
		来ているんだ			
3	01020028/01020116	"彼氏から電話"	@横下	@中頭	
3	01020116/01020220	"彼氏から電話"	@継続	@横下	@中頭
15		寄っても？ @縦左		@行頭	
3	01020220/01020322	"彼氏から電話"	@横下	@中頭	

If you enable "Output all location information" and output, location information will be output for all subtitles, including ones in the default format.
(←In this example, the default format is Horizontal Bottom(横下) / Center(中頭))

In the original CAP file specifications, position information is not written to subtitles in the default position.
However, recently, we have come across special cases where position information is required for vertical subtitles depending on the delivery destination. Therefore, we have made it possible to include position information for all subtitles, even though it deviates from the original CAP file specifications.

●Import SRT (SubRip Text) *Paid option
- We changed the wording of the checkbox for "For continuously/overlapped subtitles" in the [Advanced] tab as follows. This is just a change in the wording, so the specifications remain the same as before.

<After>   <Before>

2) Fixed Bugs

●Export SRT (SubRip Text)
●Export WebVTT
- We have fixed a problem where the out time in exported SRT/WebVTT would sometimes be 1 frame shorter when [Change timecode to real-time.] was selected.

3) Notes on inheriting settings such as shortcut key assignments after uninstallation and reinstallation

With Ver.3.1.2, we improved the software so that it can inherit customized settings such as user settings and shortcut key assignments when you reinstall the software after uninstallation. However, due to the function enhancement of Windows, we have found that these settings might be reset and returned to the initial state upon uninstallation.
To ensure that your settings are inherited after reinstallation, please follow the steps below:

※Normal updates that do not require manual uninstallation will not have any problems.
※This occurs regardless of the version. Please not that it might happens even if you are not using this version.

■If you are using Ver3.1.1 or later
Export your settings from the Shortcut Key Settings screen, reinstall the software, and then import the settings file from the Shortcut Key Settings screen again.

※Settings that have been saved in the list beforehand such as User Settings, Format Settings, Final Check Items Filter, Check Word of Final Check will not be lost.

■If you are using version older than 3.1.1
Export User Settings, Shortcut Key Settings from each screen, reinstall the software, and then import the settings file from the same screen you exported them.

※Settings that have been saved in the list beforehand such as Format, Check Word of Final Check will not be lost.
