

<How to Uninstall Sentinel Protection>

 **Do not plug in the USB dongle during uninstallation!**

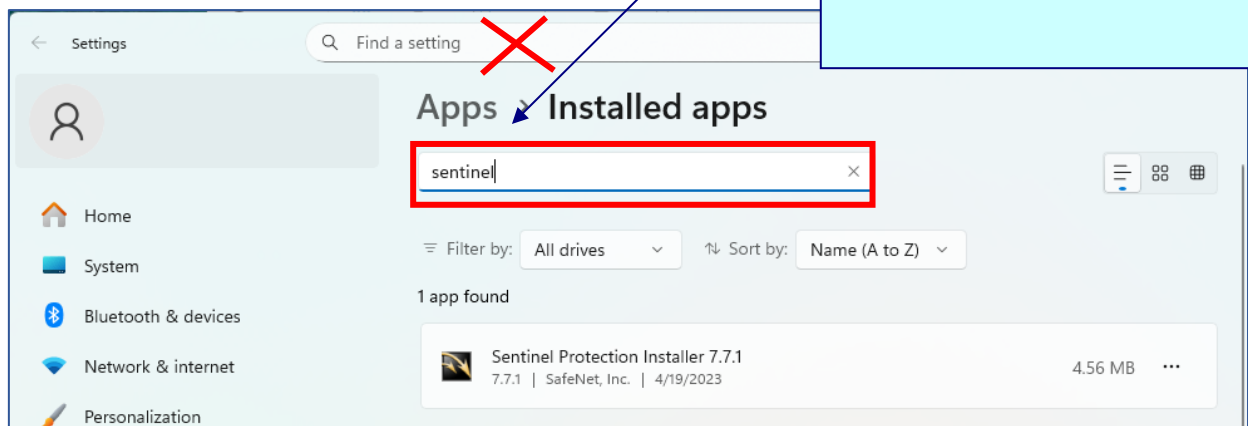

1. Right-click the Windows logo 「  」 at the bottom of your desktop and click "Installed Apps."

2. Enter "sentinel" into the [Search apps] bar.

Note: Do not use the [Find a setting] bar, as the app will not be displayed.

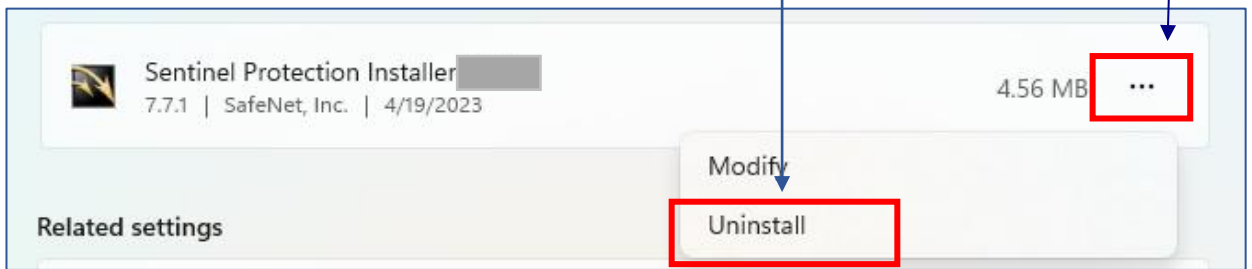

Apps > Installed apps will be displayed.

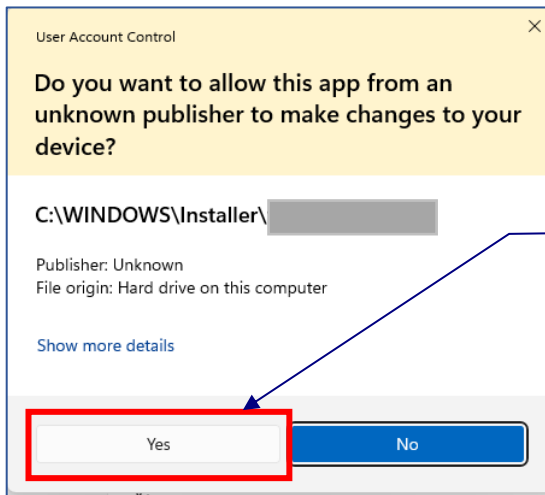

Verify that the **Sentinel Protection Installer** is present.

* There is no need to uninstall the “Sentinel System Driver” .

3. Click [...] on the right and then click "Uninstall".

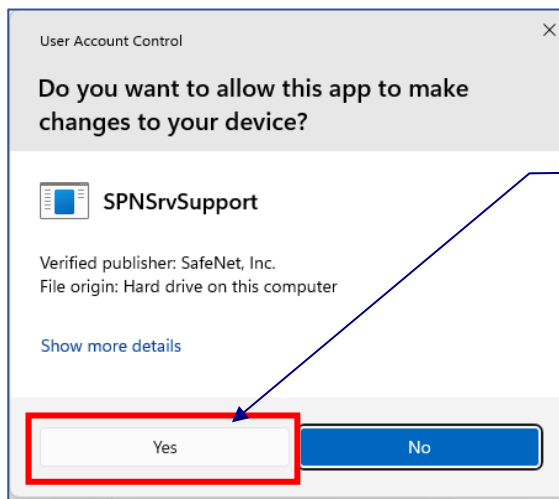

4. Click [Uninstall].

5. Click "Yes" if this message is displayed.

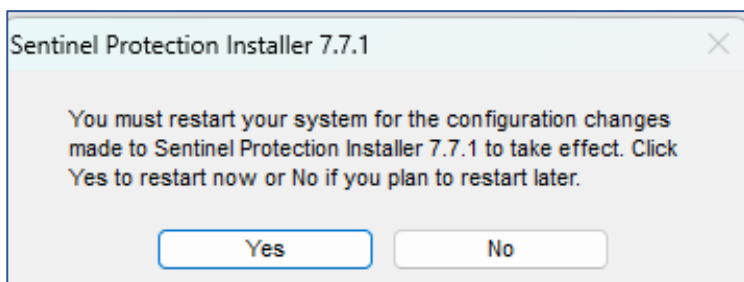

This message may not appear in some cases.

6. Click "Yes" if this message is displayed.

This message may not appear in some cases.

7. Click "Yes" or "No" to complete the uninstallation.

 After the uninstallation is complete, be sure to restart your PC.
